**Noble Gems Publications is pleased to announce the publication of the third edition of**

## DIAMONDS

by Mr. Marijan Dundek

This edition has been completely redesigned, updated and expanded, with new chapters and dozens of full-colour illustrations, including images of some of the world's most beautiful diamonds. A new section on natural colour diamonds provides descriptions and illustrations of each main colour group. While these

diamonds represent a burgeoning part of the diamond trade, there is little information about them in the popular literature, and Mr Dundek's book is one of the few to cover the subject.

Written in clear, concise and jargon-free language, this book aims to help the reader in acquiring a basic knowledge of diamonds and an understanding of the main factors that determine their value and quality. The reader will also find information on the history of diamonds and growth of the diamond industry, plus a new chapter on the life story of one very special diamond, from its discovery to final transformation.

As the top-selling guide to diamonds, the popular first edition was praised by its readers for its clarity, comprehensiveness and usefulness. This new edition will be of interest both to those already familiar with the book and to new comers, whether professional jewellers and gemmologists, valuers and auctioneers, students and teachers of gemmology, prospective buyers of diamonds, or simply those interested in learning more about this most prized and captivating of gems.

Diamonds is sold by the National Association of Goldsmiths and numerous bookshops, including Rubin & Son worldwide, Harrods, Sotheby's, Foyle's and Waterstone's as well as online by Amazon. Also available from Cookson Precious Metal.

The RRP is £14.95 ■
